Negroes Barred From Saloons. Springfield-Soon after the triple lynching here, in April, half the saloons in town entered into an agreement not to sell drinks to negroes over the bar. Following the defeat of local option, nearly all of the remainder of the saloons notified colored patrons that drinks would be refused them hereafter. On several occasions negro applicants have been unable to obtain a dramshop license, and only recently Judge Neville declined to give a negro club a charter. Many of the saloons have discharged their negro porters and have employed white help. New York, Aug. 20.-The preliminary statement of the Erie Railroad for the fiscal year ended June 30th, 1906, made public to-day, shows gross earnings of over \$50,000,000, an increase over the previous year of \$4.-277,000, and an increase in net of

\$1.547,000. Of the increase in working expenses \$2,730,000, an expenditure of more than one million dollars was in maintenance of the roadway, which was given an unusually liberal allowance of new steel rail and ties. Operating expenses during the same period had an additional charge of \$1,000,000, in rehabilitating the equipment, the result being that the power has been placed in an excellent condition for increased business. The additional expenditures in the improvement of the roadway and equipment are manifestly in the right direction and are a direct addition to the assets of the Company.

Not the least interesting showing is that the Company incurred an additional expense of only \$100,060, in conducting the transportation of over \$4,000,000, additional gross earnings. This is a further indication that the improvements which have been completed are producing the desired results in lessening the cost of transportation. About \$2,000,000 of the Company's income was used for further improvements of the property during the year, an increase of \$566,000 over the previous year.

The Company is now better prepared to handle a largely increased business than ever before in its his-

SECOND HAND MAIL BOXES. Why a Little Village May Have Big

Numbers in Its Post Office. The man who was spending his summer vacation in the country was looking quizzically at the mail boxes in the rural post office.

"I did not know this was such a large place," he said. "I thought it had a population of only about 4 000 but the mail box numbers run much higher than that, and I don't suppose every one in town rents a box either." The postmaster peered out of his little barred window.

"I can explain that," he said, "You see the country post offices never get new boxes, but we have those ich over when the city establishments make over their offices and get new boxes. So you see lots of country places are bound to have high numher boxes.

"Although our numbers run over 4,000, you won't find any less than 1,000, some other country post office drew the lower enes. I myself would rather get the big numbers, for it makes us seem like a bustling little city."
